

# A letter to all:

*Kollman's  
Greenhouse Inc.*

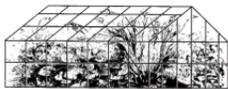

It is with immense pride and pleasure that Scott and I announce we have sold our business, Kollman's Greenhouse, to our daughter and son in law, Derrick and Betsy Bresky. We are excited that our family business is moving to the second generation of ownership. Betsy and Derrick pledge to bring the same traditions of high quality plant material and outstanding customer service that are the hallmarks of Kollman's Greenhouse.

Betsy earned her Bachelor of Science in Horticulture from Michigan State University, and her Master of Science in Plant Breeding from Cornell University. She has spent the last eight years with Four Star Greenhouses, Proven Winners, in research and development, and was instrumental in bringing new breeds of flowers to the world marketplace. Derrick earned his Associate of Applied Science in General Technology from Monroe County Community College. He is every greenhouse owner's dream when it comes to solving mechanical and structural problems. Their knowledge and experience will serve them well in this industry. We have every confidence they will successfully build on the business we leave them.

Kollman's Greenhouse, which Scott and I have owned for 44 years, was built with our blood, sweat, and tears. We raised our three children in the business. Our families and friends pitched- in when we needed them. And our employees- well words cannot express the gratitude we have for them, past and present. They are an amazing and hard-working group of individuals who come together as a team, and have built, alongside us, the highly regarded reputation that Kollman's Greenhouse enjoys today.

Our success is attributed to all this, and of course to you, our favorite customers! We thank you for your friendship, the laughs we have all shared, and your generosity in returning to Kollman's each year for those special purchases that enhance your homes and bring joy to your lives. As Scott has said to me year after year, "this is what it's all about!" And it is. However, this is not goodbye just yet! Scott and I will work together with Betsy and Derrick through this transitional period. And later, as Betsy and Derrick begin their solo flight, Scott and I will slowly ride off into the sunset.
